Rationale for goal

The statewide graduate and professional total enrollment goal was determined by adding the goals of the public universities and AIKCU, which were negotiated based on historical trends, cohort data, and institutional programs and priorities.

About this measure

This indicator tracks the number of full- and part-time students enrolled in graduate or professional degree programs in the fall semester (not including post-doctoral students or house staff). This measure provides another snapshot of Kentuckians' participation in postsecondary education and reflects the state's investment in the professional, scientific, academic, and managerial workforce.
